

# AMERITAS LIFE INSURANCE HOME OFFICE RENOVATION SKYLIGHT SHOP DRAWINGS

## SPECIFICATION EXCERPTS

### Glass:

Monolithic,  $\frac{3}{8}$ " laminated glass with a .030" clear polyvinyl butyral interlayer

### Finish for framework, flashings and gutters:

Clear anodized 215 R1 class-I architectural with a 0.07 mil film thickness.

### Warranty:

Defective materials and workmanship will be replaced for a period of 5 years from the date of substantial completion.

## NOTES

### △ Architect and General Contractor:

Please note steel support clip location information for coordination with miscellaneous steel contractor, pages 5, 7 and 8. Steel clips angles are removed from under the gutter along grid line A and from the top chord of the steel truss along grid line B. Clips are added to the cross beams along grid lines 23, 25, 27 and 29.

**DRAWING APPROVAL:** We have reviewed these drawings and approve their use for construction of the canopy. Any comments or suggestions have been added to the drawings.
